

GAS SUPPLY CONTROL PANEL - He

10111.00.0.00

Key facts:

- Pressure regulation 0 - 100 bar
- Stable pressure at high gas flow
- Easy installation between gas supply unit and Impact EC-GM-Unit EvoCSII
- Disconnection from the supply network for maintenance work

The Gas Supply Control Panel - He is a pressure reducing unit which can connect any helium gas supply system to the Impact-EC-GM-Unit EvoCSII. The component is designed for the control of a maximum inlet pressure of up to 200 bar. The pressure control includes a dome pressure reducer and ensures stable process

conditions. The outlet pressure can be regulated between 0-100 bar. In order to protect the following impact spray system, a safety valve against excessively high pressures and a filter element against contamination are installed.

Technical data

Compatibility	Impact Spray System EvoCSII
Process gas	He
Max. inlet pressure	200 bar
Outlet control range	0 - 100 bar
Safety valve	100 bar
Filter element	40 µm
Length	617 mm
Width	363 mm
Height	187 mm
Weight	22 kg
