

INJECTOR - IN3 (SiC)

10208.00.0.01

Key facts:

- Minimum coating diameter Ø84 mm
- Silicon carbide (SiC) nozzle

The nozzle Injector - IN3 is designed for the ID Coating Device and is suitable for bores with a minimum diameter of Ø84 mm. Operation is only possible in conjunction with water cooling. This greatly reduces wear and tear and the risk of nozzle clogging.

The SiC - nozzle, with a low surface roughness on the inner contour, is extremely resistant to clogging and is therefore mainly suitable for softer materials.

Expansion ratio: 12.5

Total length: 55.0 mm
