

PORTABLE ADAPTOR

FOR CENTRAL INJECTOR KIT & CENTRAL INJECTOR KIT FOR WCPI

10109.00.0.00

Key facts:

- Flexible handling of the Central Injector Kit / CIK for WCPI
- Compatible with all variants of the Impact Gun
- Hot gas hose length 2 m, 4 m
- Max. process temperature 600 °C
- Max. process pressure 45 bar

The Portable Adapter is an accessory designed for use with both the Central Injector Kit and the Central Injector Kit for WCPI (Water Cooled Powder Injector).

It is compatible with the Impact Gun 5/8 & 6/11, but not compatible with the Impact Gun 6/11 AH.

By separating the Central Injector Kit from the Impact Gun, the Portable Adapter enables more flexible handling.

When used with a compact manipulator system, it allows coating of areas that are otherwise difficult to access.

The standard hot gas hose length is 2 m, with an optional extension up to 4 m.

The Portable Adapter supports a maximum process temperature of 600 °C and a maximum process pressure of 45 bar.

An insulating jacket around the hot gas hose reduces heat loss. The thermocouple cable pocket runs along the jacket to the central injector.
