

NOZZLE - OUT6

10209.00.0.01

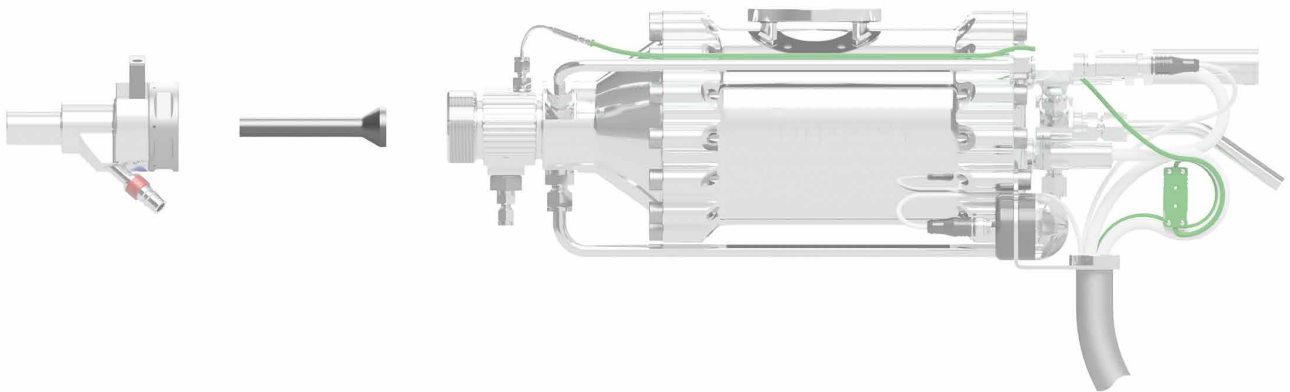

Key facts:

- Specially designed for spraying polymer materials
- Stainless-steel construction for durability and process stability
- Optimized flow path for uniform particle distribution
- Suitable for temperature-sensitive and low-melting materials
- Compatible with all Impact Gun variants and various add-on components

The Nozzle - OUT6 is designed for cold spraying polymer materials at low process temperatures. Its stainless-steel design provides high structural integrity and ensures uniform particle acceleration and stable flow conditions even with soft, temperature-sensitive feedstock.

The OUT6 is compatible with all Impact Gun variants and is recommended for applications requiring gentle acceleration and low thermal input.

Technical data

Expansion ratio	1
Total length	190.7 mm
Material	Stainless steel
