

NOZZLE - IN4 (WC)

10210.00.0.01

Key facts:

- Minimum coating diameter Ø107 mm
- High particle velocity

The Nozzle - IN4 is designed for the ID Coating Device and is suitable for bores with a minimum diameter of Ø107 mm.

Due to its length and geometry, a high particle velocity is achieved.

Operation is only possible in conjunction with water cooling. This greatly reduces wear and tear and the risk of nozzle clogging.

The WC nozzle has a high wear resistance and is suitable for very hard materials. It has a low surface roughness on the inner contour. The smallest cross-section corresponds to the OUT1 and OUT2 standard nozzles.

Technical data

Expansion ratio	12.4
Total length	78 mm
Material	Tungsten carbide (WC)
